

Scott Barkhouse
Field Manage Operations

The many projects I have worked on over the years have taken me across Canada from Ontario to B.C. and into remote Inuit and 1st Nations Communities (where my work really made me feel that I was giving something back to a community). In the last 5 years of my career, I have become interested and involved in alternative and GREEN building. I have a heartfelt passion for this area and am fortunate that DXB Projects believes in this methodology as well.

Past Projects

Residential: From 1,000 to 5,000 sq ft, Custom Design Homes in Ontario, Manitoba, Nunavut and British Columbia, Condominium Complexes, in Manitoba and British Columbia, Custom Renovation Work, Ontario and Manitoba, as well as time sensitive contract work, Ontario.

Commercial: 7,000 to 20,000 sq ft. Banking Facilities, Manitoba, 70,000 sq ft. Manitoba Theater for Young People, Manitoba, 30,000 sq ft Northern Store, Ontario, 20,000 sq ft Town Hall, Ontario

Design Build: 18 Unit Condominium Complexes, British Columbia

Institutional: 100,000 sq ft. Extencicare Health Care Unit, two (2) 40,000 sq ft School, St. Joseph, and North Caribou School, both in Ontario, Nunavut Elementary School, complete mill work finishing.

Alternative and GREEN building: 4,000 sq ft. Strawbale Construction with alternative heating, cooling and water systems, British Columbia
